

## Martin/ F. Weber Co. Product Safety Certification

The AP (Approved Product) Seal of the independent, non-profit Art & Creative Materials Institute (ACMI), identifies art materials that are safe and that are certified in a toxicological evaluation by a medical expert to contain no materials in sufficient quantities to be toxic or injurious to humans, including children, or to cause acute or chronic health problems.

The CL Seal of the independent, non-profit Art & Creative Materials Institute (ACMI), identifies products that are certified to be properly labeled in a program of toxicological evaluation by a medical expert for any known acute or chronic health risks and with information on the safe and proper use of these materials.

ASTM  
D-4236

ASTM D-4236 identifies art materials that are certified in a toxicological evaluation by a medical expert to contain no materials in sufficient quantities to be toxic or injurious to humans, including children, or to cause acute or chronic health problems when tested in accordance with the Federal Hazardous Substances Act (FHSA), it's Labeling For Hazardous Art Materials Amendment (LHAMA) and ASTM Standard D-4236. Despite this, these products carry California Proposition 65 Labels for Lead (Pb) Cadmium (Cd) Cobalt (Co) or Nickel (Ni) as noted below.
