

Martin/F. Weber Co.

Manufacturers of Fine Artists Materials Since 1853

FOR IMMEDIATE RELEASE

Martin/F. Weber is proud to feature a new Getting Started with Oil Rouging set with easy to learn instruction by the very talented Decorative Artist and Teacher, Mary Owens.

Philadelphia, Pa. November 2006. Martin/F. Weber has released a new compact set that provides excellent instructions and materials for Mary Owens Oil Rouging technique. The set contains one tube of Martin/F. Weber Oil Paint Transparentizing Medium and six tubes of Professional Permalba® Oil Colors, Cadmium Yellow Medium, Alizarin Crimson Permanent, French Ultramarine Blue, Paynes Gray, Burnt Sienna, Burnt Umber plus easy to learn instructions for Mary's popular Oil Rouging technique.

What is Oil Rouging? Mary's Oil Rouging is blending Martin/F. Weber Oil Paint Transparentizing Medium with Professional Permalba® Oil Colors to create transparent color glazes over Pen and Ink designs. Mary's easy to learn technique can also be used to glaze layers of color over acrylic basecoats, transparent oil painting projects and other non-porous sealed surfaces.

Martin/F. Weber Oil Paint Transparentizing Medium is used to transparentize oil colors and as a flow medium for stroke work. This medium is ideal for antiquing, oil rouging and may be used as a varnish. It extends drying time of oil colors, giving you time to make changes and develop your desired effect. Brushes used with this medium can be cleaned with soap and water. The medium is certified by ACMI as AP non-toxic.

Professional Permalba® Oil Colors are manufactured with the finest pure densely concentrated pigments and the highest quality refined linseed and safflower oils to minimize after-yellowing and to provide maximum film flexibility and permanence. The Professional Permalba® 64 color range provides all rated pigments that are Lightfastness 1. Each color contains the maximum amount of pigment to achieve the optimum tinting strength when blended with the finest Original Permalba® White.
